

AJAI AARUMUGUM M

Java Developer | Software Engineer | Spring Boot | REST APIs | Backend Development

+917305215929 | ajaimurugan2004@gmail.com | LinkedIn | GitHub | Bengaluru, India

PROFESSIONAL SUMMARY

Recent Computer Science Engineering graduate with hands-on experience in Java, Spring Boot, REST APIs, SQL, and backend development. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks. Experienced in building backend projects involving secure payment processing, AI integration, databases, and REST APIs. Seeking an entry-level Software Engineer or Java Backend Developer role to apply problem-solving skills and build reliable software solutions.

WORK EXPERIENCES

Android & Generative AI Engineering Intern | Internship

Feb 2026 - May 2026

Mindmatrix

Hybrid • Bengaluru, India

- Developed **Jatre Namma Pride**, an Android application for discovering Karnataka's traditional Jatre village fairs using Kotlin, Jetpack Compose, and MVVM architecture.
- Integrated **Google Gemini API** to provide AI-powered cultural storytelling and contextual recommendation features.
- Developed core modules including **Cultural Stories, Lost & Found, Live Schedule, and SOS Alerts** using Firebase Firestore, Authentication, Cloud Storage, and Room.
- Debugged and resolved authentication flow and WebView integration issues, improving application stability across test builds.
- Collaborated in an Agile team using **Git and GitHub** for version control and code reviews.

Technologies / Skills Used : Kotlin, Jetpack Compose, MVVM, Google Gemini API, Firebase, Room, Git, GitHub

PROJECTS

PayFlow — Payment Processing & Settlement Platform

Java Backend Developer

- Developed a secure payment-processing and merchant-settlement platform using **Java, Spring Boot, Spring Security, JWT, REST APIs, PostgreSQL, JPA/Hibernate, Redis, Kafka, Docker, JUnit 5, Mockito, and Testcontainers**.
- Designed versioned REST APIs for payment authorization, refunds, transaction tracking, settlements, and webhook notifications, implementing **idempotency, role-based access control, asynchronous event processing, validation, and centralized exception handling**.
- Built automated unit and integration tests for payment workflows, duplicate transactions, authorization failures, refunds, and rollbacks.

Technologies : Java, Spring Boot, Spring Security, REST APIs, PostgreSQL, Redis, Kafka, Docker, JUnit 5

SupportSense AI

Java Backend Developer

- Developed an **AI-assisted customer-feedback platform** using Java, Spring Boot, REST APIs, PostgreSQL, Redis, Resilience4j, Docker, OpenTelemetry, and OpenAI/Anthropic APIs.
- Implemented provider-independent AI orchestration with prompt engineering, versioned prompt templates, PII redaction, structured JSON response validation, asynchronous processing, rate limiting, retries, timeouts, and circuit breakers.
- Created JUnit 5 and Mockito tests for AI responses, malformed outputs, provider failures, rate limits, and fallback scenarios.

Technologies : Java, Spring Boot, REST APIs, OpenAI/Anthropic API, PostgreSQL, Redis, Resilience4j, Docker, JUnit 5

Biometric-Enabled Merchant Payment System

Embedded Systems and Backend Developer

- Developed a biometric-enabled merchant payment system using **ESP32, C++, R307 fingerprint sensor, SHA-256, HTTPS/TLS, PHP, MySQL, HTML, CSS, and JavaScript** for secure customer authentication and wallet-based transactions.
- Implemented fingerprint enrollment, biometric verification, balance inquiry, payment authorization, transaction logging, merchant management, and offline transaction synchronization with retry handling.
- Achieved **1.8-second average transaction time, 100% synchronization success for 50 offline transactions**, and tested the system with **500 transaction attempts across 20 participants**.

Technologies : ESP32, C++, R307 Fingerprint Sensor, SHA-256, HTTPS/TLS, PHP, Apache, MySQL, HTML, CSS, JavaScript

SKILLS

Programming Languages :	Java
Frameworks & Libraries :	Spring Boot, Android Development, Jetpack Compose, JUnit, REST APIs
Tools & Platforms :	Git, GitHub, Postman, Docker, Linux
Databases :	SQL, MongoDB, Firebase
Soft Skills :	Problem Solving, Teamwork, Time Management
Languages :	English, tamil, kannada, malayalam, telugu, Hindi

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional — Oracle University
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate — Oracle University
- Software Engineering Job Simulation — Forage, Commonwealth Bank
- AI Skills Passport — EY & Microsoft
- Claude Code 101 — Anthropic

EDUCATION

ACS College of Engineering | Bengaluru, India

Dec 2022 - Sep 2026

Bachelor of Engineering – Computer Science Engineering

CGPA : 8/10

- Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Principles of Cloud Computing, Embedded Systems, Object-Oriented Programming.
